SHOW MORE TO SELL MORE WITH MOOD MEDIA CONTENT SCHEDULING SOFTWARE, TEAMCO

Display your visual content anytime, anywhere

TeamCo is a web based application that allows any type of visual content to be displayed anywhere, at any time. Built specifically for your visual network, whatever the project; no matter how simple or complex. Mood Media technologies are made so integration with other systems such as live feeds, database links and much more is easily made possible. All our technologies are being continually developed to suit the demands of the digital screen marketplace. Whether it is a customised TV solution, an interactive touch screen or a visual entertainment service, Mood Media has the solution to support it. MOOD MEDIA'S CONTENT SCHEDULING SOFTWARE, TEAMCO DISPLAY YOUR VISUAL LANGUAGE IN FOUR EASY STEPS

Mood Media will guide you through your entire visual project. Create your TeamCo visual content package in four easy steps:

- create and gather your content
- integrate visual content into dynamic sequences
- manage play lists
- play via TeamCo solution

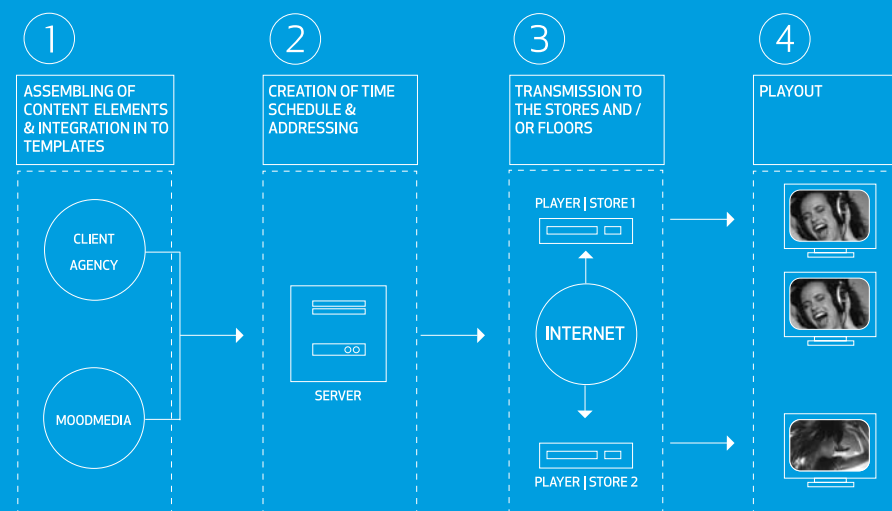

Mood Media's content scheduling software has appealing features and industry leading benefits. TeamCo enables any type of visual content to be broadcast at any time and at any location. In a nutshell, TeamCo is built to enhance POS communication concepts; it is:

- easy to use; can be managed by your local store managers or by Mood Media
- a complete hands free operation
- fully compatible with Mood Media's music and radio services
- built specifically to fulfill the requirements of your visual communications solution

Appealing features:

- possibility to share a multi-client server
- periodic or immediate updates on demand
- optimised bandwidth occupation
- visual content stored directly on hard drive
- updates can be done online or via satellite and DVD
- RS-232 commands for managing external device
- possibility to have up to 3 different video streams and 2 audio streams on one player
- ability to integrate with TV or with live-content streams
- possibility to supervise, monitor screens and players remotely, and to tele-maintain them without local interaction
- report function: possibility to report metrics of all played content per site
- dynamic play-listing and addressing functionality
